

To Whom It May Concern:

I would prefer that the NO CALL LIST mean exactly that - no call. If you set the precedent of allowing banks an 18 month grace period, then other businesses will request the same. This will defeat the no call list's desired effect. Since the no call list has gone into effect, my household receives 6 - 8 less calls per evening (6pm - 10:30 pm). It was so bad that we took turns answering the phone. Please consider the precedent you would be setting and vote to NOT allow banks or any other business the right to invade our privacy.

Also, please allow us to add fax machine numbers to this list. I'd like to see companies that send unsolicited faxes prosecuted. I have sent reams of unsolicited faxes to you only to receive a letter saying there wasn't anything you can do, but I could prosecute them myself. I'm trying to cut my business expense in my office, not increase the legal fee expense. Why make the laws if all you are going to do is issue warnings? Warnings are NOT enough, there must be penalties for violating the law! and they MUST be UPHELD.

Thank you!
